## The modern Italian Iveco bus in our town

In keeping with the contract signed between the City Council of Cracow and the firm Mobilis, the agglomeration bus line Wieliczka-Kraków is being attended upon by the new low-floor vehicles equipped with ecological engines, air-condition and the newest electronic equipment. The project concerning activation of a new bus line between Cracow and Wieliczka is being carried-out by the City Council of Cracow in cooperation with and with the financial assistance of the Wieliczka Municipality. Since May 1st one can reach Wieliczka directly from the centre of Cracow by the means of a public communication bus signed with the number 304. The bus can be described as an express and stops on the following bus stops - starting from the Main Railway Station West (the Gallery) - The Bagatela Theatre, Philharmonia, Plac Wolnica, Korona, Bieżanowska, the Prokocim Hospital, Wieliczka Kopalnia Soli, Wieliczka Rynek, Wieliczka (terminus of the buses no. „204”). The agglomeration bus line no.302 is attended upon by the private transporter - the Warsaw-based firm Mobilis. It's been a month since the transporter started transporting the residents on the route Wieliczka - The Main Railway Station. The introduction of the modern yellow Iveco vehicles onto the roads of our municipality took place one week later than planned as the complicated procedure of registration of the Italian vehicles in Poland delayed the process.
